```
...1658\Documents\NeetCode\CPA\Part 2\Module 1\1-1.cpp
1 //What is the output of the following snippet ?
 3 #include <iostream>
 4 using namespace std;
 6 class A
 7 {
 8 public:
        float v;
 9
        A() { v = 1.0; }//default constructor
10
11
        A(A& a) { A::v = a.v; cout << "1"; }//copy constructor
12
        ~A() { cout << "0"; }//destructor : outputs 0 when an object
13
                              //goes out of scope
14 };
15
16 int main()
17 {
18
        //A a,b;//=>00
19
        A a, b = a_i //=>100
20
        //1 : copy constructor is called because of b = a
21
        // 00 : destructor is called twice because a and b went out
22
23
        //of scope
24 }
```
